

# Unified Control Center

Discover Panorama,  
the integrated SCADA solution for safety-security

CODRA

## Integrated SCADA solution for safety and security

Panorama:  
drive your performance

Panorama Suite addresses the various safety and security issues within your infrastructure. It is a unique operational support system.

### Bring your business systems together

Bring together your **operational data** with information from **third-party systems** in a single application. Panorama is compatible with industry standard interfaces and technologies.

### View your entire infrastructure

Give your operators a **global view** of all your field systems and equipment.

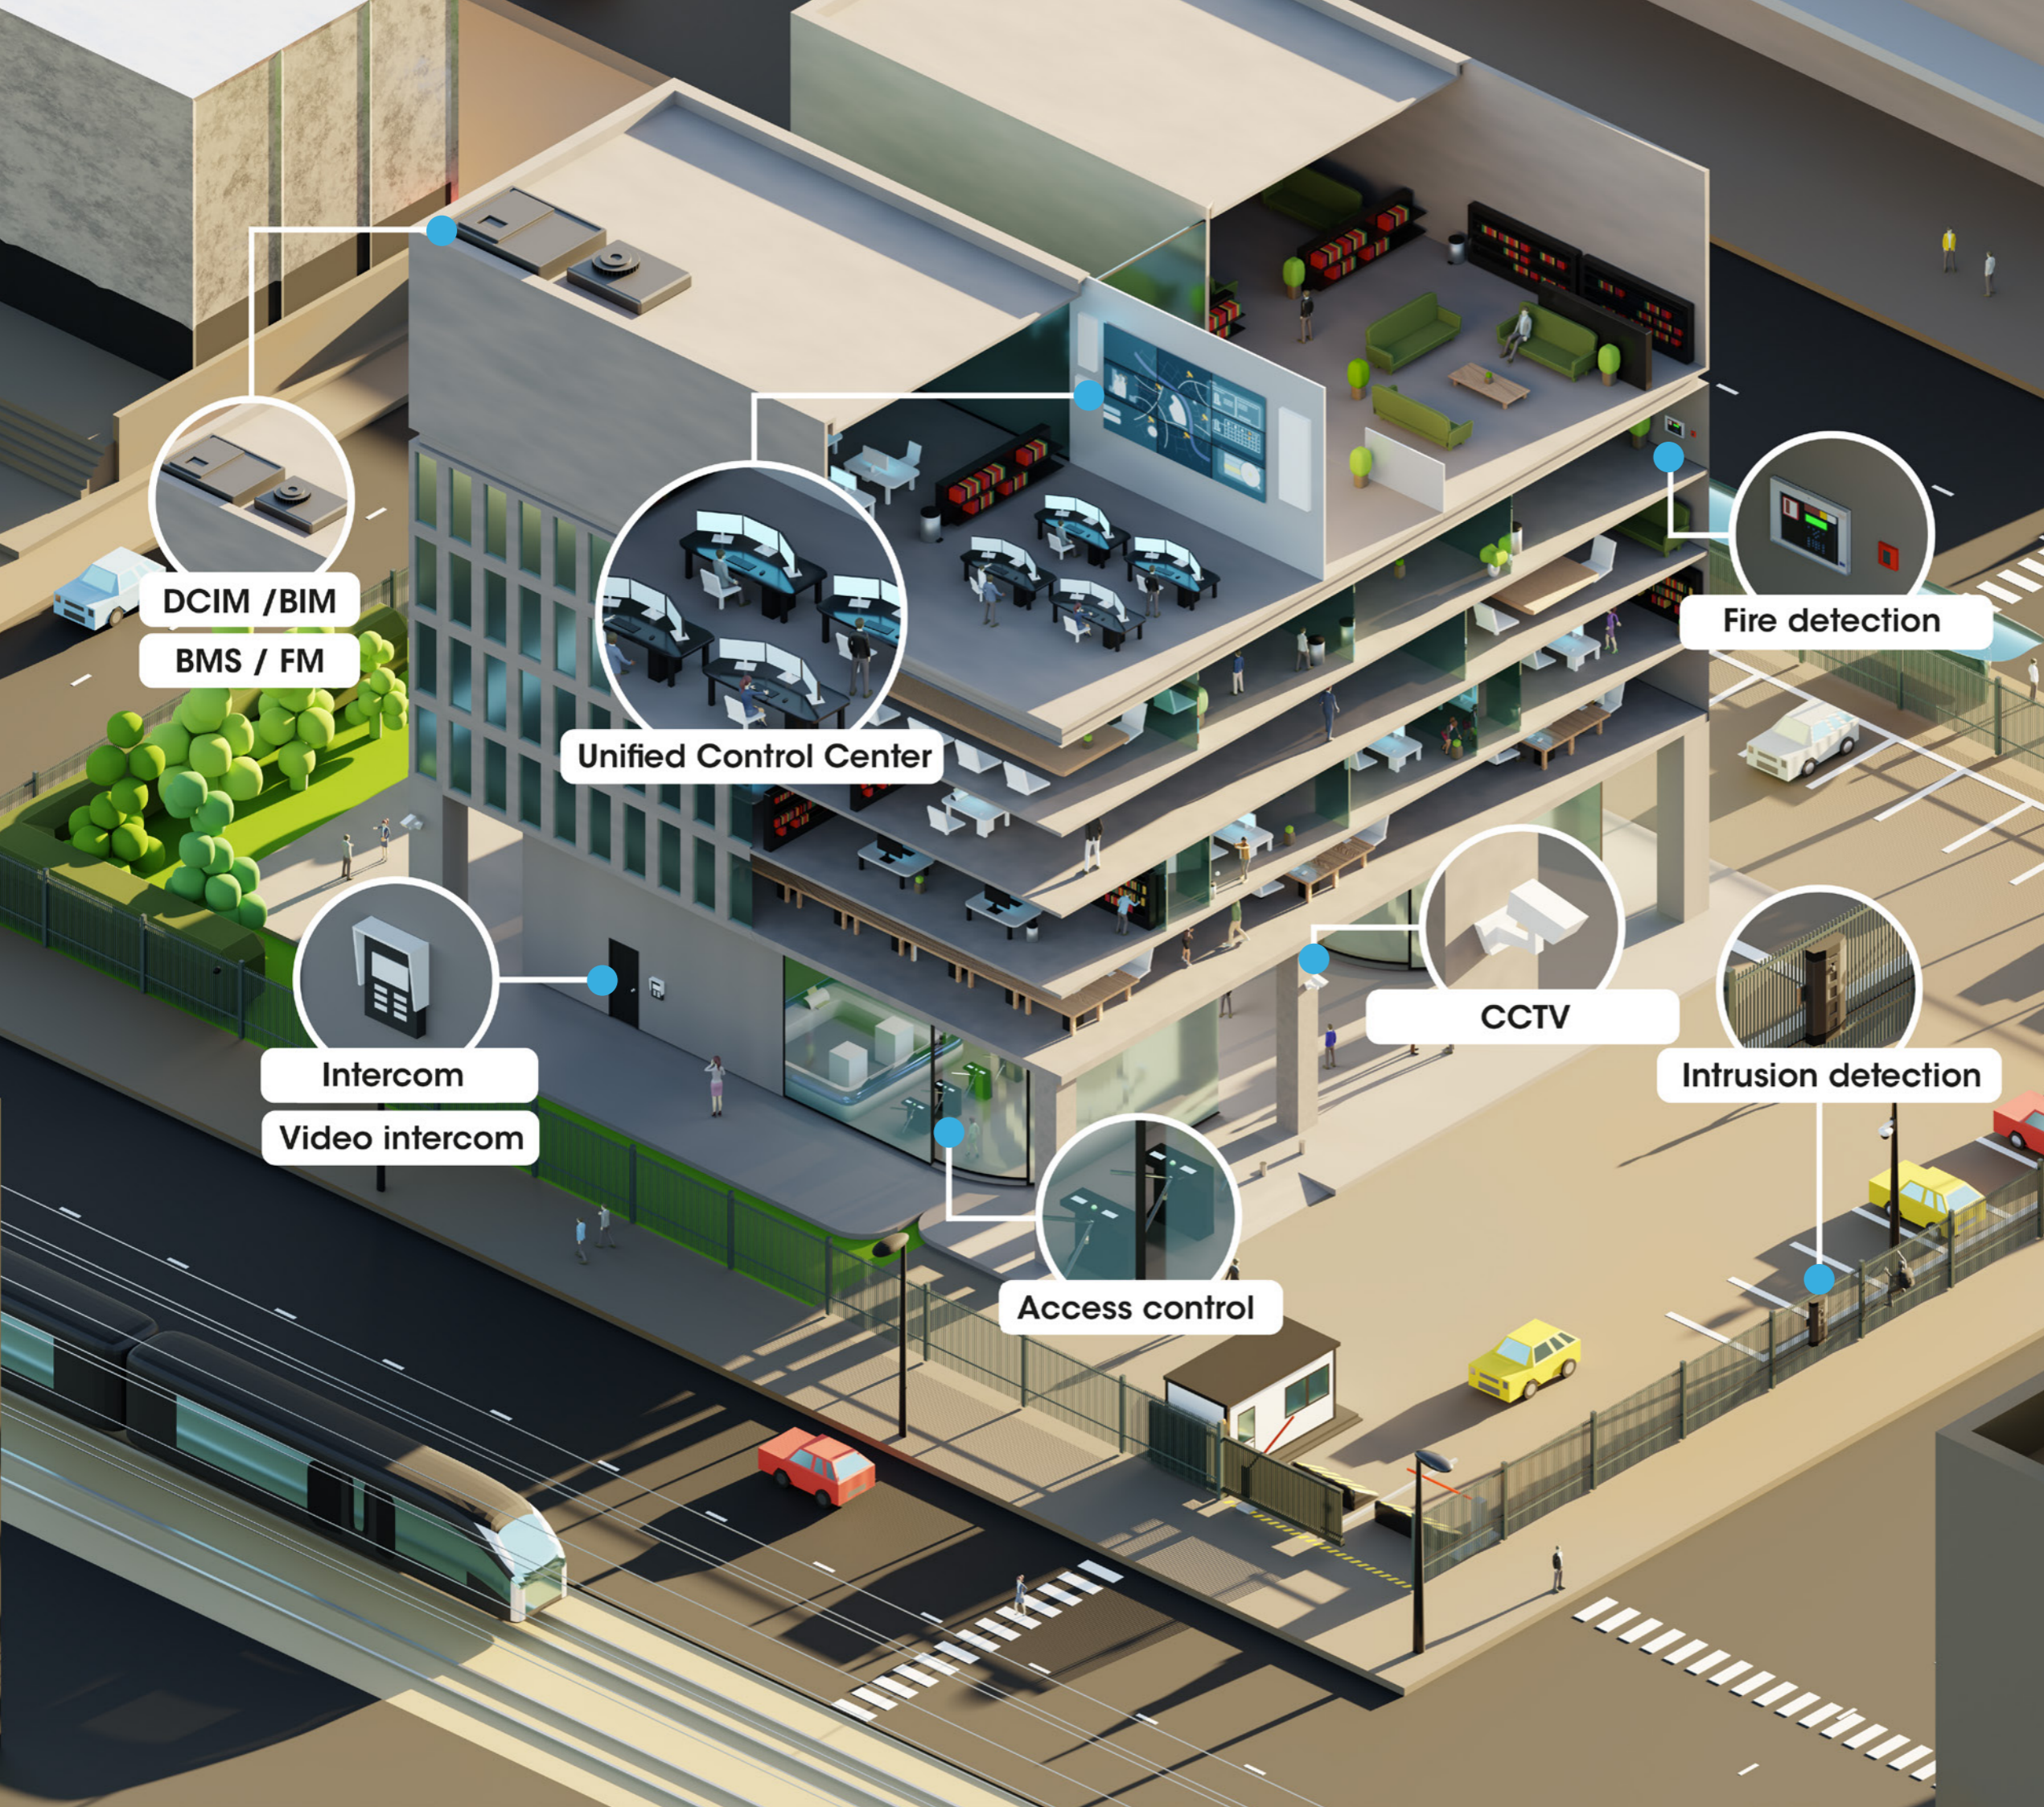

Converge your systems (CCTV, access control, intercom, etc.) with your FM/BMS/BIM.

### Strengthen your security systems

The Panorama **integrated SCADA solution** helps operators in their daily tasks:

- get real-time alerts about a malfunction or an intrusion,
- optimise, analyse and respond,
- facilitate maintenance activities to those on-call,
- anticipate failures,
- create response scenarios involving several systems,
- consolidate and compare operational information,
- optimise operating costs without shutting down equipment.

*Choosing Panorama, is choosing an Integrated SCADA solution that provides simplified and unified management of your infrastructure's safety and security.*

## Panorama software suite benefits

Real time and historical video wall

Remove any doubts about your alarms

People tracking and badge use history

### Cybersecurity

Choose a robust solution with ANSSI certified security mechanisms, so that you can avoid downtime or major incidents.

### Scalability / Adaptability

A Control Unified Center capable of adapting to the different business needs of those involved in safety and security. Upgrade your Integrated SCADA solution by easily integrating new equipment or systems.

### Openness / Interoperability

Use a solution that allows you to interface with your facilities systems (VMS, CMMS, SIEM, GIS, etc.). Enable a wide range of brands and equipment to coexist while retaining freedom of choice.

### Multi-sector

Whatever your sector of activity, the Panorama integrated SCADA solution meets the needs of secure sites: establishments open to the public, industry, datacenters, government departments, banks, military bases, etc.

### Robustness

The Panorama platform is an integrated, open and secure tool with architecture options tailored to your business needs. It provides operators with day-to-day ease-of-use, while reinforcing the security of your installations.
