

Essentials Web Unlimited

On SCADA projects, “bigger” SCADA platforms tend to lack competitiveness: they are considered too expensive, too complex, with offerings that are difficult to understand. Often, “lighter” or highly specialised alternatives are preferred.

However, using more general SCADA application means benefiting from a higher level of quality, robustness and durability — without sacrificing the simplicity you expect.

Enjoy the experience of Panorama now with unlimited web clients, for every projects

- 1 Packaged solution:** the essentials are included, fewer options, fewer special cases
- 2 More predictable costs:** no additional costs during the project
- 3 Easy maintenance and deployment:** capitalize on the Panorama skills you have already acquired
- 4 Extended SCADA usage:** more connected users, both for control and decision-making
- 5 Codra and Panorama quality for all:** quality, cybersecurity, sovereignty, sustainability

Essentials Web Unlimited

A clear package deal

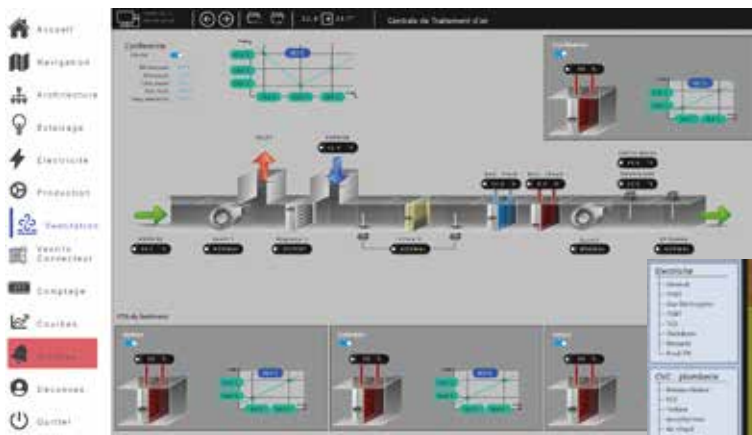

- Unlimited Web clients
- Up to 25,000 tags
- Up to 2 communication protocols
- Plus, a development workshop too !

The same Panorama quality

- Ease of use : intuitive, ergonomic interfaces
- Scalability and flexibility
- High standards of built-in cyber security
